

ADVANTAGES

- Ideal for filtering moderate concentrations of most external and internal source pollutants
- Compact filter with molecular media.
- Removal of gaseous contaminants
- Can be used to upgrade existing installations
- Classified according to ISO 10121-3

Application	Adsorption of odours and gases in air conditioning applications.
Frame	Plastic moulded
Gasket	One piece PU gasket (01 in the standard version)
Media	Activated Carbon
Separator	Hot-melt
Sealant	Polyurethane
Dimensions	Filter front dimensions according EN 15805
Recommended final pressure drop	2x Initial pressure drop
Max Temperature (°C)	40° C
Relative Humidity max	70%
Installation Options	Front and side access housings and frames are available.

The CitySorb filter utilizes a highly effective broad spectrum carbon media to ensure removal of a very wide range of airborne chemicals. The broad spectrum carbon operates with a Rapid Adsorption Dynamics (RAD) mechanism that is specifically designed to be highly efficient against the multiple chemicals that are typically present in low or moderate concentrations in city-centre buildings or other locations.
